EPIC CONDITIONS

15 x 30 — HDready
Available Immediately

Produced in 2007

Explore the dynamics between perfect weather conditions and perfect location to create the ultimate extreme sports adventure. EPIC CONDITIONS follows thrill seekers as they test their skills against some of the planet's most harrowing conditions, blending extreme sports with the science of weather to showcase top athletes in sports such as white-water rafting, big wave surfing, and sailing.

EPISODES INCLUDE:

Surfing in Mavericks, California

This fierce wave consistently reaches heights of 20 feet during the winter months. Its speed and steepness in addition to its size make Mavericks an exhilarating and dangerous ride. Cold water, strong currents and sharp rocks are some of the hazards surfers face at Mavericks. In 1994, legendary big wave surfer Mark Foo drowned here!

Heli Snowboarding in Valdez, Alaska

Chugach Mountains receive over 600 inches of high-quality powder snow per year. These 3,000 to 4,000 vertical runs are only accessible by helicopter. Some of the best snowboarders in the world ride helicopters to the top of these jagged summits to ride acres of untouched powder.

Skydiving in Arizona

As weather plays a prominent role in their safety, Arizona has suitable conditions where clear skies and low breeze levels occur on a regular basis. Top athletes and novices alike use Arizona as a training ground because of its supreme year-round conditions.

Rock Climbing in El Capitan, Yosemite National Park, California

This 3,000-foot granite monolith tests climbers with long and difficult routes. Climbing has inherent risks including loose rocks, gear failure and rapidly changing weather conditions. The park service conducts 15-25 climbing rescues out of more than 100 climbing accidents in Yosemite each year.

ABOUT THE PRODUCER

The Weather Channel, a 24-hour weather network, is seen in nearly 94 million U.S. households. Its Web site, www.weather.com, reaches more than 30 million unique users per month. Its content is generally ranked within the 15 most popular in the U.S. by Nielsen//Net Ratings. The Weather Channel also operates Weatherscan, a 24-hour, all-local weather network available in 22 million households, The Weather Channel Radio Network, The Weather Channel Newspaper Services, and is the leading weather information provider for emerging technologies. This includes broadband and interactive television applications, with wireless weather products accessible through high-speed Internet services, phones, pagers and personal digital assistants. The Weather Channel is owned by Landmark Communications, Inc., a Norfolk, VA-based, privately held media company.
